Title: Dual Camera Mount for Stereo Imaging

Group: 2851

Examiner: Mahoney

Docket No.: QUA 1844.08A

Assistant Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

Please amend the above identified patent application as follows:

**In the Specification:**

On P8, column 1, line 16, please delete "torsion### spring 18" and substitute "torsion spring 16".

**In the Claims**

Please amend claim 3 as follows:

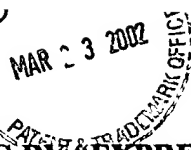

3. (amended) A method of aligning the image focal plane of two cameras comprising the steps of :

(a) providing a non-adjustable mounting for one of said cameras, said non-adjustable mounting affixed to a gear, friction disc, or pulley (collectively "gear") such that when one of said cameras is attached to said non-adjustable mounting, said camera remains in a fixed position with respect to said gear; and

(b) providing an adjustable mounting for the other said camera affixed to the other said gear comprised of two brackets held together at three points by adjustable screws with a spring located in the middle of said adjustable screws applying force opposite to said adjustable screws such as to keep said two brackets separated, but permitting the pitch, yaw, roll and distance between said two brackets to be adjusted by turning said adjustable screws; and
